DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14 drawn to an electrically programmable and erasable memory device, classified in class 257, subclass 321.
 - II. Claims 15-27, drawn to a method of making an electrically programmable and erasable memory device, classified in class 438, subclass 15+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of depositing a layer of conductive material over the insulating layer and selectively removing portions of deposited conductive material, the layer of conductive material could have been deposited on selected portions of the insulating layer instead of on the entire insulating layer.
